

## AT A GLANCE

Nexus Circular is a commercial leader in advanced recycling with an innovative technology that is revolutionizing the way discarded plastics are managed.

Nexus' advanced recycling technology can restore polyethylene, polypropylene and polystyrene plastics to productive use, accelerating a circular economy and reducing the accumulation of plastics in the environment.

## KEY METRICS

By diverting plastics from landfills, Nexus is developing new pathways to accelerate plastic recycling so that the environment can thrive.

Converting

4/7  
types of  
plastics

Addressing

60%  
plastic types  
produced

Diverting

MM+  
lbs  
annually of used  
plastic from landfills

## BENEFITS FOR THE TRANSPORTATION MANUFACTURING SUPPLY CHAIN:

### 1 INCREASED CIRCULARITY

Facilitating advanced recycled feedstocks to create virgin-quality plastics that can be continually recycled.

### 2 REDUCED LANDFILL COST

Diverting millions of pounds of used plastics from landfills and incineration, enabling cost savings and reducing environmental impact for manufacturers.

### 3 INCREASED SUPPLY CHAIN EFFICIENCY

Providing transportation manufacturing companies and suppliers an opportunity to improve their environmental performance and competitiveness.

### 4 FEEDSTOCK SUPPLY PARTNERSHIPS

Partnering with manufacturers to meet their waste reduction goals, which represents a win-win-win for Nexus, our supply partners, and the environment.

## EXAMPLES OF TRANSPORTATION MANUFACTURING PLASTICS FOR ADVANCED RECYCLING:

PE/PP  
Purge Patty

Shrink Wrap  
& Films

Rigid Plastics  
& Pallets

Trays &  
Packaging

Manufacturing  
Parts Bags

Bubble  
Wrap

Bins

Damaged/Out  
Of Spec Parts

Protective  
Foams

Boat/Auto  
Covers

Vehicle Paint  
Protection Film
